

Summary Nordic RDA-meeting afternoon, September 26, 2019

Actions

Question to RDA Board: How could we develop an open RDA editor as long as RDA Toolkit is restricted?

(We should look at RIMFF, LC BIBFRAME Editor and Libris XL in the meantime)

Comment to RDA Board: The ALA presentations about the new RDA were available for a limited time, which we found too short

Next EURIG meeting: Address the need of examples (in English?) in the new RDA Toolkit

Nordic workshop on aggregates

We decided to hold a one-day Nordic workshop on aggregates in association with the NNG meeting in Trondheim, Norway, which will take place in the spring of 2020

- Organise the meeting: choose examples and the template for the Application profile (Katarina, Olle, Hallfridur, Hanne)
- Investigate if we can have access to a room for a one day meeting (Frank)
- We will together catalogue different aggregates during that meeting
- We have to be selective when choosing examples
- Book examples mainly – concentrate on the aggregate aspect
- After the cataloging we will make an application profile for books
- Katarina creates a page on Google docs where we place types of aggregates, examples etc.
- We have until the beginning of January to choose examples
- We will then have a Skype meeting to discuss the workshop
- Should we invite the Latvians to this meeting, since they are members of the NNG (Frank/Hanne)
