# Introduction

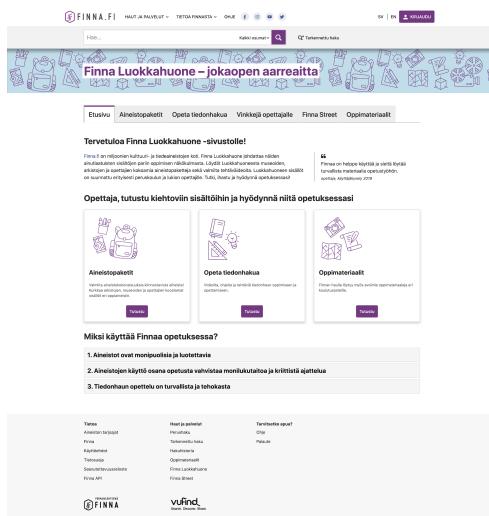

This report presents data for the service <https://finna.fi/Content/luokkahuone> during the period from 2019-10-01 to 2020-07-31

Due to limitations in how tracking has been configured in Matomo certain types of data is very time consuming to generate. Therefore the report also suggests some improvements that should be implemented in Matomo.

The key activity is to set up a proper url structure so that content in an educational package can be tracked more easily by simply looking at the url structure. In the current dataset used for this report, every individual page needs to be mapped to a package manually. This is almost impossible to do since content is also added, moved and removed over time.

I also strongly recommend to purchase the plugin called custom reports that will give users a better possibility to create ready made filters for specific groups of pages etc.

## Startpage

The startpage for Finna Classroom works as a navigation hub that helps users to reach the classroom content.

For the report period the amount of Unique pageviews (Number of unique browsers) was **15.656** and the page was viewed **33931** times. Out of Unique pageviews 10.513 (or 67%) started their visit on the startpage of Finna Classroom. This means that most users found this resource from another source.

The avg generation time was 0.19 seconds which is a very good number from a Usability perspective.

PAGE URL	▼ PAGEVIEWS	UNIQUE PAGEVIEWS	BOUNCE RATE	AVG. TIME ON PAGE	EXIT RATE	AVG. GENERATION TIME
<a href="https://finna.fi/Content/luokkahuone">/Content/luokkahuone</a>	28,676	15,658	47%	00:00:47	51%	0.19s

## Returning Visitors

The ratio between new and returning visitors seems to be pretty stable over time for the period.

However the avg amount of actions is a lot higher for returning visitors. returning visitors  $\approx 10$  new visitors  $\approx 5$

The average visit duration is also a lot higher for returning visitors (5 min 44sek) than for new visitors (2 min 15 sek).

VISIT NUMBER ▲	VISITS	% VISITS
1 visit	1,406,407	64%
2 visits	270,473	12%
3 visits	112,718	5%
4 visits	63,645	3%
5 visits	41,867	2%
6 visits	30,194	1%
7 visits	23,130	1%
8 visits	18,542	1%
9-14 visits	64,758	3%
15-25 visits	50,896	2%
26-50 visits	45,410	2%
51-100 visits	31,179	1%
101-200 visits	18,522	1%
201+ visits	15,480	1%
<b>Totals</b>	<b>2,193,221</b>	<b>100%</b>

Looking at the **number of visits** for different users tells us that 64% only visited once. 12 % twice etc.

## Days since last visit

DAYS SINCE LAST VISIT ▲	VISITS
New visits	64% 1,404,414
0 days	35.9% 787,509
1 day	0% 759
2 days	0% 163
3 days	0% 75
4 days	0% 62
5 days	0% 41
6 days	0% 36
7 days	0% 27
8-14 days	0% 57
15-30 days	0% 35
31-60 days	0% 15
61-120 days	0% 5
121-364 days	0% 17
365+ days	0% 6
<b>Totals</b>	<b>2,193,221</b>

Looking into **days since last** visit tells us that visitors Visits per number of pages

## Visit duration - pages

VISIT DURATION ▲	VISITS
1 page	19.5% 427,494
2 pages	38.5% 844,566
3 pages	6.4% 140,360
4 pages	7% 152,925
5 pages	3.7% 81,715
6-7 pages	6.1% 133,570
8-10 pages	5.1% 111,485
11-14 pages	3.8% 82,569
15-20 pages	3.1% 68,739
21+ pages	6.8% 149,798

This one is pretty interesting. There are 149.000 visits (7% of total ) with more than 21 pageviews.

Quite a few sessions really engage on the site. The number is pretty high so this can not only be internal visitors.

# Package interactions

## Add list to Favorite

This feature was used 277 times during the period and 78 different lists were saved.

The data could not be compared to previous periods, since it was not tracked the same way. A 9 lists were used more than 10 times, but most of the lists (53) added were only used 1 or 2 times. There are also several lists that were never added.

This is ID's of the most saved lists, again here it would really help with better metadata (for example a valid title for lists describing them would make it easier to create understandable reports). If the title sent was something like: "**Add to list - Haaveilu, suunnittelu ja muistelu - id: 883718**" we could create more human friendly reports in Matomo.

List ID	Times added
762421	19
810641	19
762419	17
705451	16
707487	14
705493	12
762416	12
702774	11
704024	10
703789	9

<b>Sum</b>	<b>277</b>

### Link to data for the period

[https://finna-matomo-1.csc.fi/index.php?module=CoreHome&action=index&idSite=1&period=day&date=today#?idSite=1&period=range&date=2019-10-01,2020-07-31&segment=&category=General Actions&subcategory=General Pages&filter\\_pattern\\_recursive=%2Flist%2F.....%2Fsave](https://finna-matomo-1.csc.fi/index.php?module=CoreHome&action=index&idSite=1&period=day&date=today#?idSite=1&period=range&date=2019-10-01,2020-07-31&segment=&category=General Actions&subcategory=General Pages&filter_pattern_recursive=%2Flist%2F.....%2Fsave)

## Image downloads

4225 image downloads were made, but it is hard to map them towards individual packages though since there is no matching meta-data.

### Link to data for the period

[https://finna-matomo-1.csc.fi/index.php?module=CoreHome&action=index&idSite=1&period=day&date=today#?idSite=1&period=range&date=2019-10-01.2020-07-31&segment=&category=General\\_Actions&subcategory=General\\_Pages&filter\\_pattern\\_recursive=Save%24](https://finna-matomo-1.csc.fi/index.php?module=CoreHome&action=index&idSite=1&period=day&date=today#?idSite=1&period=range&date=2019-10-01.2020-07-31&segment=&category=General_Actions&subcategory=General_Pages&filter_pattern_recursive=Save%24)

## Feedback dialogue

The feedback dialogue was opened 2900 times, but it is hard to map them towards individual packages though since there is no matching meta-data. Again adding better human readable urls or titles would make reporting easier.

## Traffic from external sources

### Learning platforms (Are teachers using the packages?)

A lot of traffic to the site comes from different learning platforms. I found 3 examples listed below (there are probably more of these platforms).

Note: This data refers to the whole site not just the educational packages.

Some of these sources generate really engaged visitors that spend a lot of time on the site.

#### Moodle

There are 50 unique Moodle (Open Source is a Learning Platform) installations that link to the packages and this has generated 22983 visits in total. [Link to the data](#).

These visits generated 1.000.395 Actions or 43,53 actions per visit.

A great source of traffic and prof of usage from teachers and students.

#### Google classroom

1631 visits that generated 12,73 actions per visit.

#### Optima learning platform

440 visits that generated 8.66 actions per visit.

### What are Actions in Matomo?

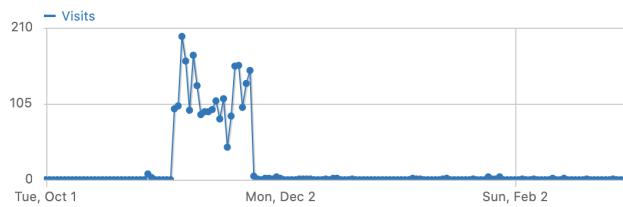

An 'Action' in Matomo (Piwik) is counted whenever a visitor:

- visits a Page,
- clicks on a Download or on an external link,
- when a visitor searches on your website search engine,
- whenever an event is tracked

## Campaigns

There was a campaign named luokkahuone 2019 running during November that generated 2,548 visits.

luokkahuone2019

# Recommendations for the future

To be able to get the full potential of you need to extend the functionality with premium plugins, below are my suggestions.

<https://matomo.org/docs/premium-features/>

## Buy premium plugins to Matomo

Prio 1: Custom reports and Media Analytics, FormAnalytics

Prio 2: Funnels, UserFeedback, HeatMaps & Session Recordings

\*Digitalist are resellers of plugins and we also offer maintained Matomo as a service with all premium plugins included.

## URL Structure

The best way would be to add a better url structure so that items would belong to packages in the URL

Instead of having the url of just

/ruokalistojen-kertomaa

You should add the parent:

/luokkahuone/ruokalistojen-kertomaa

This would give you a better collection of stats for the whole **luokkahuone package**.

Unfortunately you can't add individual items to the url structure (since they can live in many places) so instead of pageviews you should start to track the usage of items with events and add meta-data so that you know from which package each item was opened. (see examples in the tracking section below).

## Tracking suggestions and examples

I recommend starting to start implementing tracking through Matomos TagManager.

There is a good guide here:

<https://matomo.org/docs/tag-manager/>

I also encourage you to start tracking in parallel with your current tracking, you can create a new web property in your Matomo server and start tracking new data into that property while you are learning.

I would focus on getting as much metadata in as possible from the luokkahuone section.

I actually created a small set up of scripts that you could use to get started with.

To use the scripts follow these steps

1. Create a new web property on <https://piwik.finna.fi/>
2. Enable Matomo Tag Manager
3. Import the script (sent by mail) to the TagManager Container for the newly created website.
4. Publish a new version.
5. Testrun the code in your web browser (example found here).  
<https://digitalist-se.github.io/UserFeedbackDocs/tag-manager-basics.html>
6. If you are able to get data in, you can then install the tagmanager code into the code of your website (and you will start collecting data).

In the example above I created the following tracking:

Event Category	itemClick events (tracks clicks on element (open in modal))
Event Action	We collect data according to the patterns of data to the left. All items within brackets {} are variables that I collect with Javascript in Matomo, so that they work on every page with the same CMS template.
Event Name	

**Note:** The code implemented only tracks when someone open the modal, I did not implement tracking of click in the modal so this just works as a starting point of understanding how tracking works and could be implemented.

Suggested events to start implementing are:

saveList -

Open item in modal (navigate with arrows below)

downloadItem

addItemToFavorites

clickShowPictureInfo  
clickWhatDoesThisMean  
clickMore (in modal)  
clickShowFullRecord

For all the events above you want to make sure that you collect the item info and also try to collect the (last education package the user visited) so for example when someone click addItemToFavorites we would collect something like:

EventCategory: addItemToFavorites  
EventAction: {{packageName}} - {{itemName}}  
EventName: {{itemName}} - {{pageURL}}

Or clickWhatDoesThisMean  
EventCategory: clickWhatDoesThisMean  
EventAction: {{packageName}} - {{itemName}}  
EventName: {{itemName}} - {{pageURL}}

Having this structure will make it possible to set up goals, funnels(when you purchase plugin funnelks) and reports (when you purchase the plugin Custom reports) to display quite customized reports.
