

LD4P/LD4L-Labs

Community Input Meeting

Stanford 24.-25.4.2017

Osma Suominen

Tietomallikokous 9.5.2017

LD4P and LD4L-Labs are hosting an invitation-only Community Input Meeting:

- to update the community on the work of LD4P and LD4L-Labs
- to get community leaders' reaction on work of LD4P and LD4L-Labs and gather input to shape the course of our work over the next year and for future projects
- to see and compare related work from the broader community
- to identify, discuss & explore areas of possible collaboration

Rob Sanderson

Simeon Warner, Stanford:
Tooling for Linked Data in Libraries

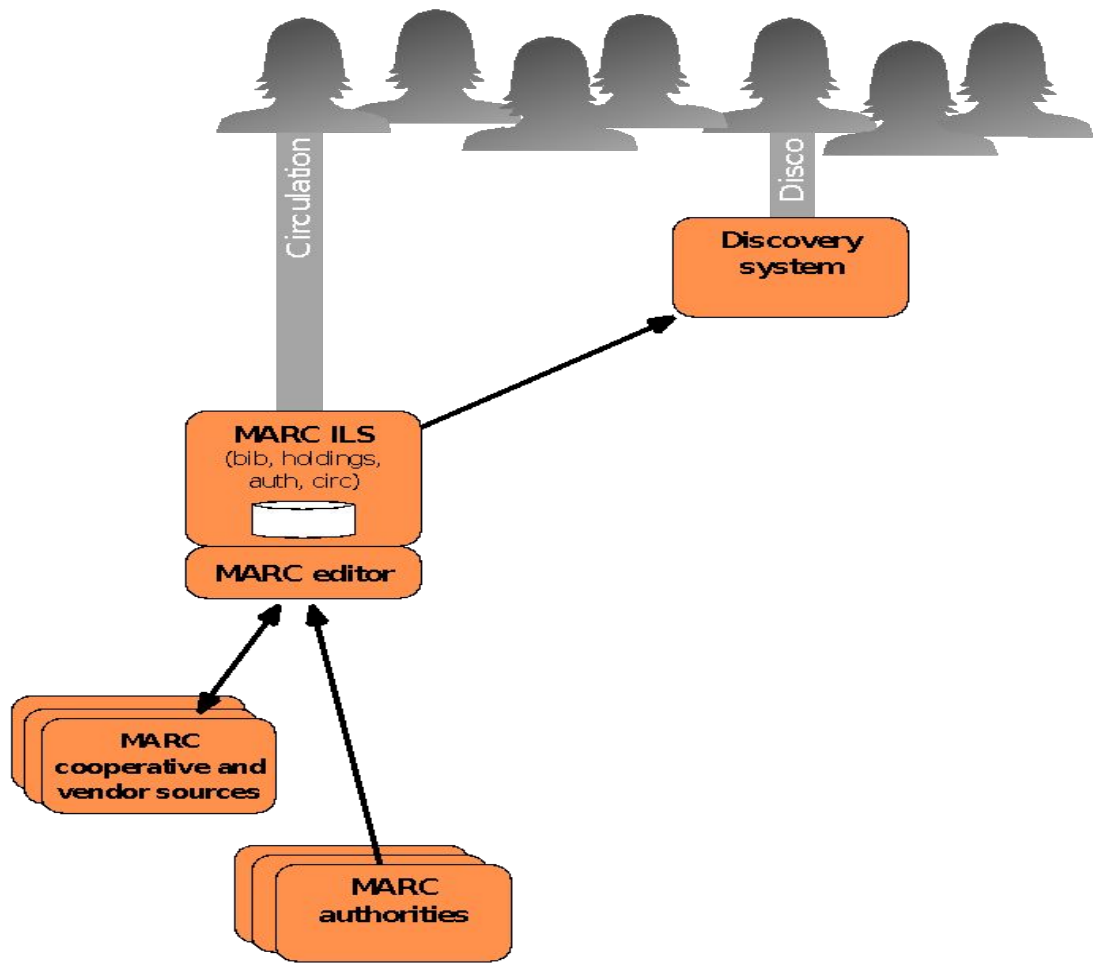

Introduction

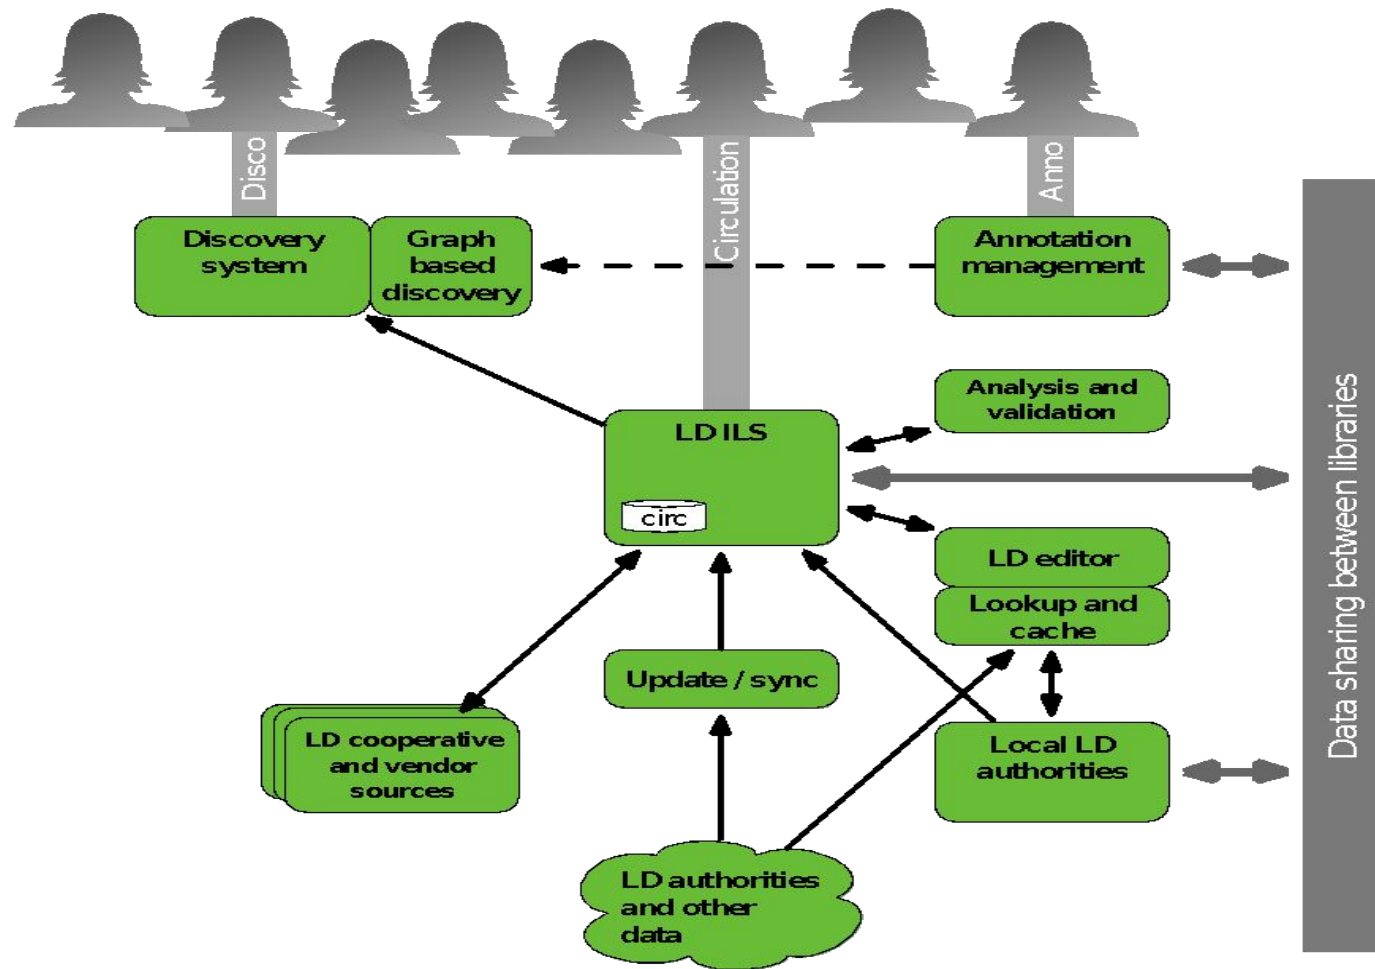

A picture of tooling to support library cataloging now and in the future that probably matches no real situation

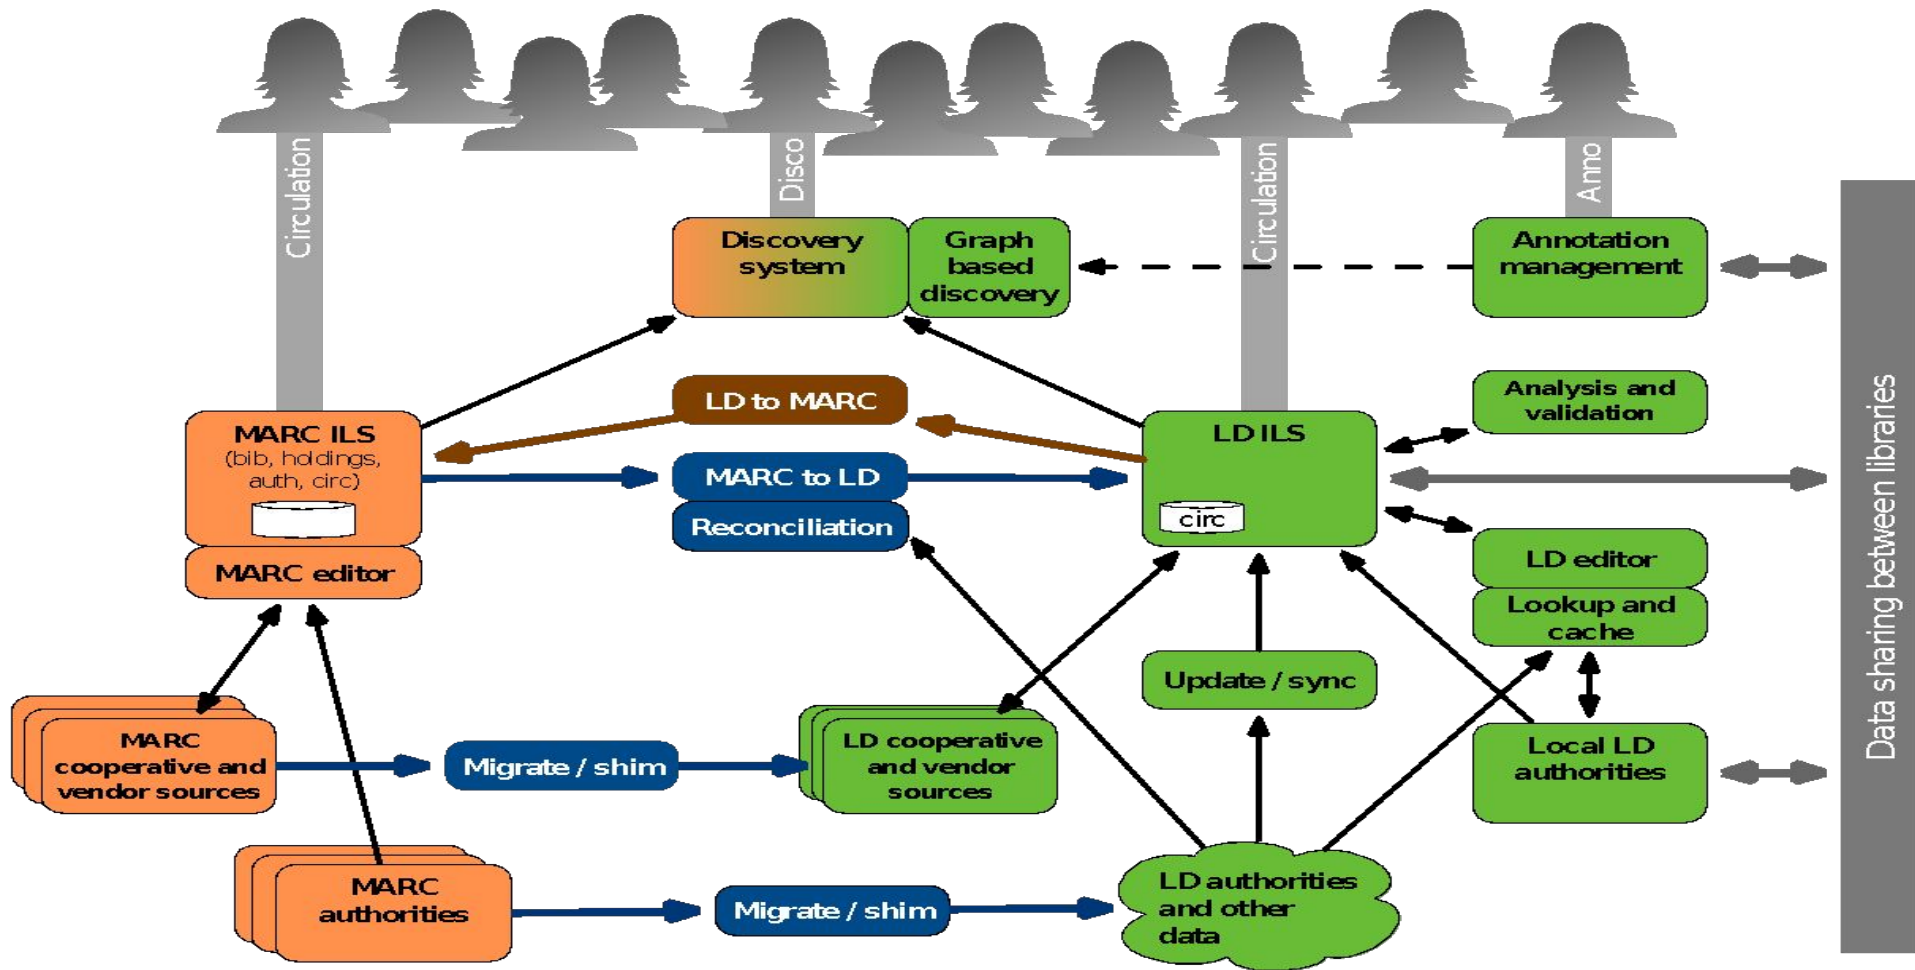

...

but hopefully has hints of many

Presenters: where does your work fit?

Sanottua

Osma Suominen

@OsmaSuominen

It's not that #MARC must die - who cares? -
but practices need to evolve with ontologies.

Linked Data Tooling

1. We need more tools.
2. ~~We have too many tools.~~ We need better information on the tools we have.
3. We need a community of development & use around tools.
4. We need more tools.

Tom Cramer, Stanford

Would BnF consider producing data directly as RDF ?

- Digitisation workflows: NO.

We just switched from an internal XML format to METS. It took years to bring suppliers to make this change.

- Cataloging: NO.

BnF's INTERMARC format has IDs and URIs for entities and links between records. It covers all types of documents and collections held by BnF. BnF's information system is based in this format entirely. Cost vs. benefits of change?

Emmanuelle Bermes, BnF

@OsmaSuominen

#BIBFRAME support in #ExLibris #Alma is a multi-year project, but it's coming --
[@shlomo_sanders](#) #Id4all

🌐 Käännä kielestä englanti

BIBFRAME in Alma

- Initial steps of BIBFRAME in Alma as a production MD standard
 - First enrich the MARC with URIs
 - MARC to BIBFRAME transformation
 - URI support
 - Native cataloging
 - (Batch) Publishing in BIBFRAME format
 - Loading BIBFRAME formatted MD
 - Work records (based on our FRBRization engine)

ExLibris

@OsmaSuominen

#BIBFRAME isn't a replacement for #MARC,
but one of many options -- @shammer46
#FOLIO #ld4all

🌐 Käännä kielestä englanti

Hypothesis

- FOLIO will exist in a heterogeneous environment
- MARC isn't going away
- Budgets for original cataloging are likely to decrease
- Libraries likely to re-use data from many sources (publishers, utilities, other libraries)
- E-resources will become increasingly important
- The community infrastructure implications of BIBFRAME are still TBD
- BIBFRAME is looking less like a replacement for MARC and more like one of many options
- FOLIO has an entity focus, not a triple focus

Sebastian Hammer, Index Data

Suunniteltua

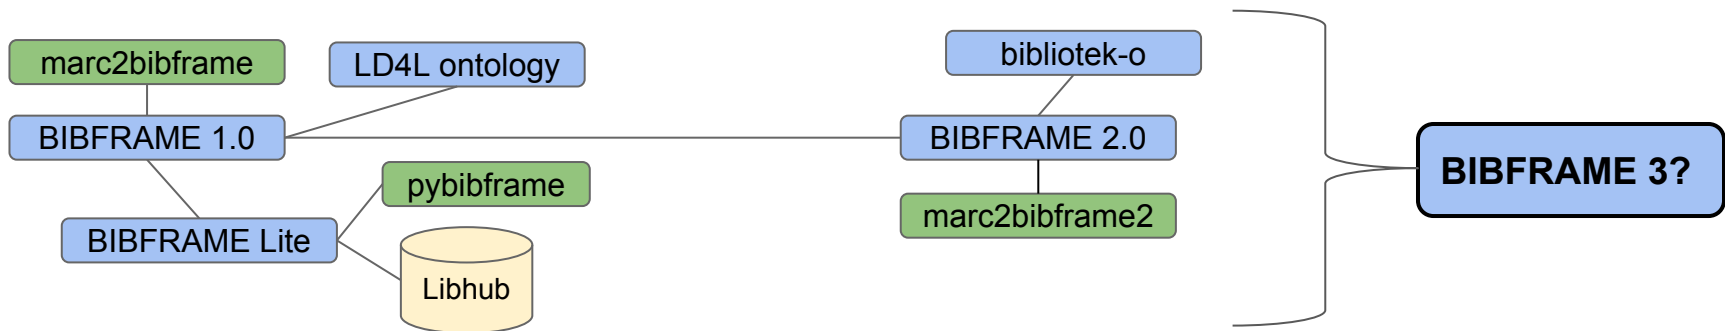

DCMI/LD4 breakfast meeting 25.4.2017

DCMI/LD4 follow-up meeting 28.4.2017

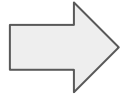

BIBFRAME-kehityksen yhteisöllistäminen?

- LC:tä lobattiin (mm. allekirjoittaneen toimesta) kohti skenaariota, jossa BIBFRAME siirtyisi laajemman yhteisön omistamaksi standardiksi
- DCMI ja LD4* voivat olla tukena tässä
- tarvitaan konkreettisempi suunnitelma, esim. blogikirjoitus
 - BIBFRAME in Europe workshopin yhteydessä julkaistava?
