2022-05-05 Pääkäyttäjäverkoston kokous

Torstaina 5.5.2022

Etäkokous Zoomilla klo 13-14.

Linkki lähetetty pääkäyttäjäpostituslistalle.

Edellinen kokous: 2022-04-21 Pääkäyttäjäverkoston kokous

Muistio

Kehittäjätuokio / Developers' hour

- Test-server situation

    - Andrii has sent new usernames & instructions for superlibrarians.
    - Q: Do libraries still need to add some local data to the test server before Andrii takes a snapshot?

        - A: If most librarians have tested, Andrii will make an as-is snapshot.
        - With separate branch for several libraries, messing up is harder.
        - Sandbox idea under consideration.
    - Q: E.g. Templates regarding Label Maker plugin are not yet there (but plugins are there). Are data related to plugins stored in snapshots?
        - A: Plugins, it depends. Info is in database, so it should follow the snapshot.
        - Johanna adds templates later today.
    - Q: Hanna had not time yet to add libraries and collections, but planning to test import. Is this ok nest week maybe?
        - A: It is OK.
- Koha update: SECURITY BUILD **KK-Koha v16.582** installed for all customers. All info here: https://kansalliskirjasto.slack.com/archives/CRAQWTEKD/p1651610668250009
    - The changelog is updated here: **Build 582**. And from community POV:
        Koha 21.11.03
        Koha 21.11.04
        Koha 21.11.05
    - These hotfixes/features which already were "hotpatched" on server, now in consolidated form, so also kept and present:
        KOHA-244: Autorenew_checkouts not properly saved and has other wrong effects
        KOHA-203: Acquisitions: when add item in placing an order wrong framework used for first item
        KOHA-270: Search orders should be possible with ISSN, too (+ items search and variations)
- **Koha upgrade: blocked URLKOHA-66 - KK-Koha release 17: Spring'22 (Koha 22.05)**
    - Upgrade will be at the beginning of June.
    - It is recommended for libraries to have superlibrarians available 1-2 weeks after the upgrade, so that possible errors and bugs are reported before holidays.
    - 3AMK is the piloting library. **Installation of new build expected on Sunday-Monday** (start of next week, week 19)
    - Not yet any list of new features. The list will be published here: **KK-team release 22.05 (17th) changelogs** next week (week 19).
    - **Translations** to the new version **can be started already**: https://translate.koha-community.org/fi/22.05/
        - Q: Deadline for translations:
        - A: Andrii will come back to this. Better to start sooner than later!
- Q: Is restarting of lending machines (or SIP2 server) still necessary after changes have been made to the library calendar or circulation rules? Is this page up to date? (Saija P.)
    - A: Andrii: I recommend to DO EXPERIMENT because I added that patch which cleans cache for SIP services, and that might work now without restart - yet, again, to confirm - we need to perform a real-life test.
- Q: About processes in libraries. The guide is about SIP server, not the actual lending machines and other physical devices.
- Q: If circulation rules are changed, do they take effect instantly without further ado? -

Muut asiat / Other business

- Anneli informs: (Public libraries') Koha version upgrade to version 21.11 is coming 7.-8.6.2022. We are working on those features that are mandatory to us. All library groups have their own test database where we configure for example system preferences and notices & slips and copy them to the production database when we upgrade. We have determined which features that must be ready before the upgrade and rest of them we can manage a while without. Superlibrarians are updating Kohan ohje suomeksi -wiki on Koha-Suomi's website. We well make short introduction videos for the staff about new features and big changes. You can follow our work at Versionvaihto-project in Redmine: https://tiketti.koha-suomi.fi/projects/versionvaihto/issues
- Case of apparently changed renewal info; Koha logs?
    - Andrii can browse Koha logs as a first step.
    - Any reports of similar nature? - Patron had a lot of loans, but this patron has marked renewables by hand. - Renewal may take some time, is the process vulnerable, if there are lots of items?

Seuraava kokous / Next meeting

- 19.5.2022.
