

2022-08-18 Pääkäyttäjäverkoston kokous

Torstaina 18.8.2022

Etäkokous Zoomilla klo 13-14.

Linkki lähetetty pääkäyttäjäpostituslistalle.

Edellinen kokous: [2022-06-16 Pääkäyttäjäverkoston kokous](#)

Asialista

Kehittäjätuokio / Developers' hour

- Discussion in Slack about Marc 001 / 003. Maybe Andrii or Inkeri will explain what's new??
 - Slack: https://kansalliskirjasto.slack.com/archives/CRAQWTEKD/p1660169797242219?thread_ts=1660042491.261969&cid=CRAQWTEKD
 - New feature "auto control value" ONLY if 001 is empty, it will be populated by biblionumber. If there is a 001 field, like records coming from Melinda, it will not be touched. Same when otherwise importing records.
 - More discussions regarding 003 (control number issuer).
 - Records with empty 001s detected in databases. A script for fix will be written.
 - Possibility of control number conflict and functionality needed will be examined, too.
 - Problems that empty 001s cause: there were a problem with random "component parts" showing, that has been fixed.
 - Hanken, Human, HAMK are the biggest problems and will not be fixed manually. Other libraries may easily fix manually.
- I just noticed a problem with Lost items in Diak: When the replacement price is deleted (not paid), the item is checked in automatically. This is a major problem, so I didn't look any deeper on the issue, just stopped using the lost status in Diak Koha. Has anyone else had this problem?
 - Replacement price is added by Koha when a customer is invoiced.
 - Some libraries have disabled it. In 3AMK, when an item is say 3 months overdue it goes to a collection agency. It is marked as lost in Koha manually, not automatically.
 - Hanna thinks this behaviour has changed during last 12 months or so.
 - Do we have a ticket on that in JIRA? If not: we need to create and accumulate knowledge/research/conclusions on that.
 - Lost problems handled in August 2021: [2021-08-19 Pääkäyttäjäverkoston kokous](#)
- More data consistency, configs unification topics, and logs clean-up questions:
 - Please refer to this Wiki page: [Unifications and review](#) (visible to superlibrarians).
 - Koha-toimisto will approach libraries separately; you may start to think about your preferences.

Muut asiat / Other business

- Vastaathan kyselyyn Koha-seminaarista: <https://forms.gle/RwpXKKhbcxem2z38L8> viimeistään huomenna (19.8.).
- Koha QA meeting with KK, CSC, directors, in Friday. Nothing special on agenda (in Finnish): <https://wiki.eduuni.fi/x/LFW5E>

Seuraava kokous / Next meeting

- 1.9.
