Edellinen kokous: 2022-11-10 Pääkäyttäjäverkoston kokous

Asialista

Kehittäjätuokio / Developers' hour

- 22.11 version update. Planned schedule: Monday 5 Dec install for 3AMK on production. Monday 12 Dec for others. 3AMK and Fikka can test new version on Koha-pre -server. All libraries can test new version on Koha test server.
    - Discussed the feasibility of the 5th but it seems to work. There has not been trouble with lending machines etc. recently.
    - Tuudo has been notified. Needs to have their connections to test server revived. Andrii will be in touch.
    - Pre-release server needs also Finna integration.

Muut asiat / Other business

- Bouncing email messages (Microsoft emails). Has this been sorted out?
    - Esa-Pekka requested filling in the table https://wiki.eduuni.fi/pages/viewpage.action?pageId=320664064
    - As far as table was updated, CSC has implemented changes (info morning 24.11.)
    - No incidents, so CSC or someone has apparently fixed something.
    - Please fill in the table further, if there's anything missing.

Emailer plugin presentation

- How to use it (Andrii & Inkeri)
