

2022-12-08 Pääkäyttäjäverkoston kokous

Torstaina 8.12.2022

Etäkokous Zoomilla klo 13-14

Linkki lähetetty pääkäyttäjäpostituslistalle.

Edellinen kokous: [2022-11-10 Pääkäyttäjäverkoston kokous](#)

Asialista

Kehittäjätuokio / Developers' hour

- 22.11 version updated for 3AMK 7.12.
 - [Release 22.11 \(18th\) changelogs](#)
 - [Release 22.11 pilot library memo](#)
 - Major issues
 - (1) The holds queue list is somehow broken. Some holds that should appear on the list are missing from the list. Some holds that should not appear on the list are on the list (e.g. items that are in transit). Andrii & co are investigating this.
 - (2) Bouncing messages go to a different mailbox(es) than earlier. Maybe we (3AMK) should add something in ReturnpathDefault
 - cron job task and policy to wipe out Finished BACKGROUND Jobs Logs:
 - **update_elastic_index** and **update_holds_queue_for_biblios** tasks: will be cleared **daily**,
 - all other job types: **90 days**.
- **Upgrade for all libraries confirmed to happen on Monday morning, 12.12**
 - the above issues (1) and (2) are not critical if even come over Monday for the next week, and we will solve them anyway, but Dev team will work on these two issues today/tomorrow (8/9 Dec), trying to eliminate those issues before the upgrade.

Muut asiat / Other business

- Still need to be checked Tritonia's disappearing bounces.
- No Tuudo issues found.

Seuraava kokous / Next meeting

- 22.12.
