

2022-12-22 Pääkäyttäjäverkoston kokous

Torstaina 22.12.2022

Etäkokous Zoomilla klo 13-14

Linkki lähetetty pääkäyttäjäpostituslistalle.

Edellinen kokous: [2022-12-10 Pääkäyttäjäverkoston kokous](#)

Asialista

Kehittäjätuokio / Developers' hour

- 22.11 version updated for 3AMK 7.12.
 - [Release 22.11 \(18th\) changelogs](#)
 - [Release 22.11 pilot library memo](#)
 - [Release 22.11 User Interface changes discussion and improvements](#). Add critical comments about the new outlook here. We'll get back to this list in January and Andrii will out views later with the community.
 - Major issues
 - (1) The holds queue list is somehow broken. Some holds that should appear on the list are missing from the list. Some holds that should not appear on the list are on the list (e.g. items that are in transit). Andrii & co are investigating this.
 - (2) Bouncing hold waiting messages go to a different mailbox(es) than earlier. There is a new logic how the email address is chosen by Koha in 22.11. Andrii changed this back to how it was working in previous version. He'll come later with a recommendation how the email settings should be set in future. [More in Slack](#)
 - New translations can be expected to be in production within a month

Muut asiat / Other business

Seuraava kokous / Next meeting

- 19.1.2023
- How often should we meet in 2023. Let's decide this in next meeting when Esa-Pekka is present
