

Release 22.11 User Interface changes discussion and improvements

Let's gather proposals and inconveniences or improvements we can do with the current release "new interface changes" here on this page. Later we can form proposals for Worldwide Community and/or create our own CSS and JS for that if needed.

Observations																	
the font is smaller than before	<ul style="list-style-type: none">Quick fix, zoom with the browser settings.	Saija															
font is even smaller in some places, for example when browsing system preferences and seeing the left panel sub-menus		Inkeri															
accessibility issues are not perfect (someone used https://wave.webaim.org/ to check content accessibility)	<ul style="list-style-type: none">Green links are hard to discern.	Saija															
Main Koha logo on all pages smaller so harder to point & return to root page																	
House "logo" on all pages smaller so harder to point & return to root page		Inkeri	<div>fixed by Slava 2/2023</div> <div>IntranetUserCSS</div> <div>/* "Koti-ikoni" koko</div> <div>isommaksi default -</div> <div>14px */</div> <div>#breadcrumbs a[href="/cgi-bin/koha/mainpage.pl"]:before { font-size: 24px }</div> <div>/* Fonttikoko</div> <div>isommaksi default -</div> <div>13px */</div> <div>body {font-size: 14px}</div>														
"Search catalog" is quite far on the right.	<ul style="list-style-type: none">Use shortcuts: Alt-q will jump to Search catalog (Hae tietokannasta) Alt-u will jump to the Checkout (Lainaus) NB! sadly this doesn't work for Mac Users Alt-w will jump to Renewal (Uusinta) Alt-r will jump to Check-in (Palautus)In Search catalog: Typing sn: biblionumber in the search bar will bring you to that bib record.	Johanna															
Holds of a biblio record: If you change the browser font bigger, the dates of the holds get hidden into the date box, especially the date the hold was placed:	<div>Existing holds</div> <div><div>Update hold(s)</div><div>Cancel selected (0)</div></div> <div><table><thead><tr><th><input type="checkbox"/></th><th>Priority</th><th></th><th>Patron</th><th>Notes</th><th>Date</th><th>Expiration</th></tr></thead><tbody><tr><td><input type="checkbox"/></td><td>1</td><td><div><div>↑</div><div>↕</div><div>↓</div></div></td><td></td><td></td><td><div><div>18.1</div><div>✖</div></div></td><td><div><div>19.01</div><div>✖</div></div></td></tr></tbody></table></div> <div>The size of the box should also change the size as the font size is changed.</div>	<input type="checkbox"/>	Priority		Patron	Notes	Date	Expiration	<input type="checkbox"/>	1	<div><div>↑</div><div>↕</div><div>↓</div></div>			<div><div>18.1</div><div>✖</div></div>	<div><div>19.01</div><div>✖</div></div>	Inkeri	<div>Update 10.3.23: This seems to be fixed in some update???</div>
<input type="checkbox"/>	Priority		Patron	Notes	Date	Expiration											
<input type="checkbox"/>	1	<div><div>↑</div><div>↕</div><div>↓</div></div>			<div><div>18.1</div><div>✖</div></div>	<div><div>19.01</div><div>✖</div></div>											
If you have a lot of Marc frameworks (in our case holdings frameworks) the list of the frameworks goes eventually too long for the screen in cataloging and there is no way to scroll the list. You can zoom out the browser, but it would be nice if you could somehow scroll the screen. This is a bigger problem if you work with laptop screen which is smaller.		Katriina	<div>Added 9.6.2023</div>														
Ideas for changes to be added to common file(?) or community																	

	colour on circulation and returns screen to indicate active function	<pre>#circ_circulation_issue { background: rgb(216, 251, 239);} #circ_returns_checkin { background-color: rgba(255, 20, 10, 0.2);}</pre>	Tritonia	
	hide claims tab on circulation page	<pre>ul.nav.nav-tabs li a#return-claims-tab { display:none;}</pre>	3AMK	
	button with link from cataloguing detail page to Finna (not for community)		Tritonia	
	show item list below of the item editing fields on the item editing page	<pre>IntranetUserJS: \$(document).ready(function() { \$('#cat_additem #cataloguing_additem_itemlist'). prepend(\$('#cat_additem #cataloguing_additem_itemlist>.row')); });</pre>	Tritonia	
	hide link from cataloguing detail page to OPAC (not for community)	<pre>#catalogue_detail_biblio . results_summary. opac_view { display:none; }</pre>	XAMK	
	add "clear button" to search bar (below example of Finna's search bar)		3AMK	
	<p>Holds to pull: It would be more user-friendly to have filters on top of the row (instead of having them bottom of the page).</p>
