

OAI-PMH

The [Open Archives Initiative Protocol for Metadata Harvesting](#) (OAI-PMH) is a protocol for harvesting metadata descriptions of records in a repository. We provide OAI-PMH access to several document and metadata repositories.

All OAI-PMH endpoints provide basic Dublin Core metadata. In addition, our providers support several enhanced metadata profiles.

Digi OAI-PMH

Access to digitized newspaper and journal collections via OAI-PMH.

Covers datasets

Contains metadata of digitized materials of National Library of Finland. Via metadata you get links to download the contents.

The sets of OAI-PMH corresponds to collection within Digi. The collection id visible on the web page corresponds to the set in OAI-PMH.

All available sets: <https://digi.kansalliskirjasto.fi/interfaces/OAI-PMH?verb=ListSets>

Newspaper set published until 31.12.1910 (col-401 [endpoint](#)).

Newspaper set published until 31.12.1918 (col-661 [endpoint](#)).

The Swedish Era Literature (col-381 [endpoint](#)).
